Career Summary

Holder of a bachelor's degree in computer science, I have 8 years of IT experience. I specialize in SharePoint, Office 365, web development as well as functional analysis.

I started my career at the Department of Health and Social Services as a functional analyst. I then joined the Victrix SharePoint team as a programmer-analyst where I was able to advise several clients of the company (on short-term and long-term missions) and thus deepen my skills in SharePoint, Office 365 and web development.

In 2018, I started my career as a freelancer where I worked on major Web Development projects.

Professional Experience

Freelancer

      Micro logic - SharePoint/O365 Developer

      Creating a customised team site under Office 365 SharePoint Online for Document Management.

      Intranet implementation.

      Ad hoc User support.

- **Empire de Mu (Music band) - Web Designer/Developer**

      Design and development of an official custom showcase website.

SharePoint/O365 Developer analyst

- **SSQ Insurance (Victrix Consultant)**

      The purpose of this mission was to migrate the content of multiple collaboration sites and an intranet from SharePoint 2013 to Office 365

- **Tourism Quebec (Metalogique consultant)**

      The purpose of this mission was to create an intranet site under SharePoint 2016 for the client using Content Search Webparts with custom display templates, and other features.

- **Ministry of Revenue of Quebec (Metalogique consultant)**

      Ministry of Revenue of Quebec team has put in place a new farm solution to support the organization's publishing sites. This mission was to migrate the content of multiple publishing sites that use an old site template to a SharePoint shell using the new template.

- **Virtual AC (software) (Victrix consultant)**

      The purpose of this mission was to pack Victrix's product, Virtual AC, for easy deployment to a variety of customers, including the Ministry of the Environment and Natural Resources.

- **Desjardins Financial Security (Victrix consultant)**

      The purpose of this mission was to produce modeling sheets as part of the Deployment of ITIL Processes project.

- **Quebec's general inspector (Victrix consultant)**

      The purpose of this mission was to provide support to users and editors of the VGQ Intranet. This support could be in the form of corrections to the system, training or user guides.

- **SM Tardif inc. (Victrix consultant)**

      As part of this project, the main purpose was to create a custom "feature" that allows the user to add a button in the ribbon of a library. This button opens a Webpart containing a form. When the form is shipped, a series of functions are executed through a web service.

- **CAA Quebec (Victrix consultant)**

      This project consisted in intervening in ad hoc requests for bugs, requests for changes and new feature development for the company's intranet site.

- **EBC inc. (Victrix consultant)**

      The purpose of this mission was to create an intranet site under SharePoint 2013 Foundation for the client. The realization was mainly in "out of the box" mode, with the exception of some features that required JavaScript/JQuery programming and CSS branding.

- **Arrimage St-Laurent (ASL) (Victrix consultant)**

      This project involved migrating content from an Office 365 intranet to a SharePoint 2013 on premise environment. Tasks to improve the site's architecture and user support were also completed.

- **EXFO (Victrix consultant)**

      This project involved creating a feature that is able to keep a history of document numbers from a list in the client's intranet.

Functional analyst

Ministry of Health and Social Services of Quebec

- The projects consisted of keeping several departmental functional files up to date, as well as overseeing and participating in the development of several new features.
